

Intransa VideoAppliance™ Maximum Choice

Security-optimized ViewingStations for simplified, reliable physical security...

- Easy to order, installer-ready
- Security-optimized ViewingStations, ManagementServers & VA Expanders
- Risk-free integration with hundreds of certified cameras, plus video surveillance & analytics software, access control, PSIM & other leading physical security applications, jointly tested with their manufacturers

- The VS30 Series Security ViewingStations are designed for live viewing and/or playback of full HD video streams on multiple display monitors
- Each ViewingStation is optimized for video surveillance needs, and is designed for full integration with Intransa VDMR™ software technology-based platforms
- Compact, low-noise and low-power pedestal chassis make them ideal for control centers and security offices alike, with locking drive access door
- Choice of single or dual Intel® Quad-Core Xeon® 5600 Series 2.4GHz CPU models for the most demanding graphics requirements
 - (1) Quad-Core CPU chip: AMD Radion™ HD6870 Graphics with 1GB video RAM
 - (2) Quad-Core CPU chip: AMD Radion™ HD6950 Graphics with 2GB video RAM
- Support up to 4 monitors simultaneously, with maximum system resolution of 2560x1600 (DVI, HDMI, MiniDisplay)
- Both models feature 6GB RAM memory & 500MB SATA-II Windows OS/ application drive, with Microsoft Windows 7® OS preloaded, CD/DVD read/write drive, and (2) 1GbE IP network ports
- Each ViewingStation supports a wide range of viewing streams (live viewing or playback)

Security-optimized ManagementServer for simplified, reliable physical security...

- The Security-optimized MS10 ManagementServer is specifically designed for the needs of 24x7x365 physical security, delivering a powerful yet compact management server
- Each Intransa MS10 ManagementServer is designed for full integration with Intransa VDMR™-based platforms, and includes Intransa VDMR™ out-of-the-box automated self-setup
- The MS10 features “redundant everything”, with dual, hot-swap, mirrored internal 500GB SATA-II OS and application drives and dual, hot-swap 650W power supplies for non-stop operation
- Intel® Quad-Core Xeon® 5600 Series 2.4GHz CPU for even the most demanding physical security application needs
- Microsoft Windows Server 2008 R2 Standard Edition, preloaded
- (1) VGA port with Matrox G200eW (8MB) graphics, 1024x780 maximum resolution
- (2) 1GbE IP network ports provide network connectivity
- Internal CD/DVD drive for data loading; optional external CD/DVD read/write drive
- The MS10 features a 1U rack mountable enclosure, with rail mounting kit, & locking bezel

VA Expanders for increased storage capacity

- Add modular storage capacity to Intransa Maximum Simplicity Server/ Storage Appliances and Maximum Flexibility Storage Appliances
 - Maximum Simplicity: Add 1-3 VA Expanders to each VA320 Server/ Storage Appliance
 - Maximum Flexibility: Add 1-3 VA Expanders to each VA350st &/or VA600st Storage Appliance
- Easily manage multiple appliances as a single system with built-in VSA System Center
- Add 6, 12 or 24TB raw capacity of SATA-II high capacity, low energy disk drives
- Full RAID6 support for non-stop, no data loss operation
- Dual, redundant, hot-swap 650W power supplies
- 2U rack mountable enclosures, with rack mount kit and locking bezel
